**Question 3-3**

**Phase II Archeological Survey - What is the status of the Phase II archeological survey described on Page 5-7 of the Technical Report?**

**RESPONSE**

The Applicants are currently pursuing the Phase II archeological survey. The scope of the Phase II effort is based on the recommendations received on June 7, 2007 from the Maryland Historical Trust (MHT). We intend to prepare a proposed field study plan for review and comment by the MHT. The study plan is expected by the end of March 2008. Field work will be initiated at that time and be completed as soon as practicable.
